## SUMMARY

---

An experienced Full-Stack developer, I'm proficient in ASP.NET, SQL, C#, Java and JavaScript. I'm also proficient in DevOps and building applications on Azure DevOps.

Passionate about innovative solutions and solving complex problems, I thrive in collaborative environments. My ingenuity and adaptability enable me to integrate easily into any team.

My goal is to develop high-quality products offering exceptional user experiences. I'm committed to continuous learning to stay up to date with the latest technologies.

Open to new opportunities, I am determined to make a significant contribution to your company's success.
